

# Bubbler Precision Jet - B-PJS-150

## Function

Produces a geyser jet of water. Ideal for water features with limited depth due to its small size. Designed to be submerged underwater and hidden from view, creating a more aesthetically beautiful fountain. Recommended to be installed in an overflow type basin to maintain water level height. Changes in water level will effect the performance of the nozzle.

Water level dependent.

## Specifications

### Materials

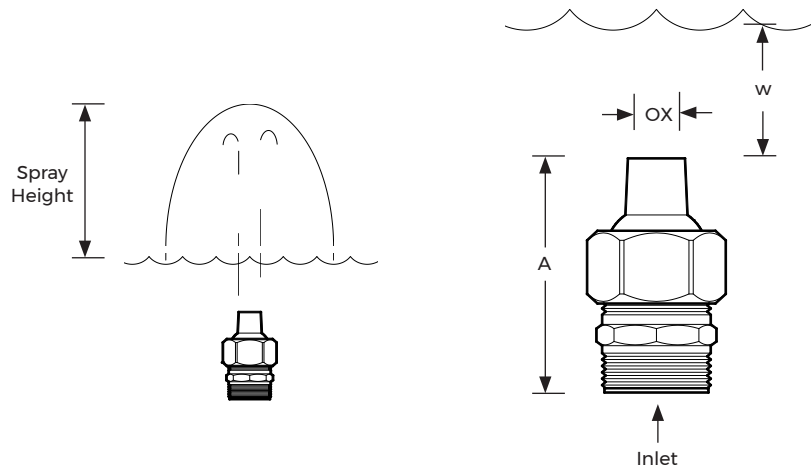

Brass with 15 degree integral swivel connection

### Connection type

Male thread

### Swivel angle

15°

Model No.	Inlet (BSP)	Nozzle Height A (mm)	Orifice Ox (mm)	W	Spray Height (m)	0.3	0.6	0.9	1.2	1.5
