

Pedestal

Function

The pedestals provide adjustable height support for all your decking and flooring requirements. For use on terraces, pool side, walkways, roofing and fountains.

The pedestals are available in heights from 35 mm - 1020 mm with a high load resistance of 800 kg each. The pedestal height can be increased or decreased by adding or removing supports or by rotating it's adjustment ring nut. Each support has a threaded base for a more precise adjustment.

Benefits:

- Simple and fast installation
- Perfect level adjustment
- Easy maintenance
- Allows access for passage of systems underneath the flooring.

Specifications

Materials

Polypropylene

Accessories

- Removable head with optional flooring spacing from 2.2 - 10mm.
- Add on levellers and slope correctors for uneven floor surface. Available from 1 % - 3 %. each leveller simply clips onto the base of the pedestal without the need of screws or clamps. Multiple levellers can be used on the same pedestal if required.

Model No.	A Height (mm)	No. of Extension required
