

# Precision Jet - PJS Series

## Function

The precision jet produces a solid, non-aerated clear stream of water. It is an excellent choice for accenting sculpture, producing archway patterns or when mounted on spray rings or manifolds, creating distinct water feature of precise definition and shape.

Water level independent.

## Specifications

### Materials

Cast Bronze and Brass w/  
integral swivel connection

### Connection type

Male thread

### Swivel angle

15°
