

Copper Water Scuppers

Function

Hand crafted Copper water scuppers with oil rubbed bronze finish. The naturally rich look is achieved by heat-setting the copper to a patina finish. The patina is a living finish that will endlessly regenerate throughout the life of the product with regular use and maintenance. Perfect for integration with matching copper fire and water bowls or simply as a design feature on its own. Easy to install, proving a glass-like sheet of water.

Specifications

Material

Copper

Water flow

57 lpm

| Model No. | Description | Length (mm) | Diameter (mm) |
|-----------|----------------------------|-------------|---------------|
| BCS4 | 4" Diameter Copper Scupper | 305 | 153 |
| BCS6 | 6" Diameter Copper Scupper | 305 | 102 |
