

Fog Misting System - Fog Cannon

Function

The FogCannon products control dust at the source by emitting extreme air velocity with large volumes of fine water droplets that physically capture and push dust to the ground, completely suppressing it from the air in virtually any site and under virtually any condition. The product range includes pole mount, base mount or trolley mount units. All sizes comes with a fan motor, high pressure fog pump, fog misting nozzle and optional automatic oscillation / tilting feature. Custom Duty FogCannon (available upon request) built within a self contained trailer unit which also include a generator and water tank.
